Foamer cleaning (intermediate cleansing after 4 - 6 hours)

12

Turn switch lock to "R".

13

Cleaning solution:

- 5ml WMF special cleaner
- 0.5 litres hand-hot water

Stir up cleaning solution.

14

Place the milk hose in the cleaning solution. Start the foamer rinse with the "+" button. Duration approx. 1 minute.

15

Place milk hose in clear water. Start rinse with the "+" button. Duration approx. 1 minute.

Cleaning of combi spout 1 x daily

16a **16b** **16c**

Machines with hose clamping valve

Machines with clamping valve: remove the milk hose.

Pull forwards with both hands.

Remove upwards from the clamping valve.

17

Unlock combi spout

18

Pull forwards

19

Clean the connection piece with a damp cloth.

20

Take apart the combi spout and, with the help of the brushes, clean thoroughly under flowing warm water.

21

Cleaning solution:

- 5ml WMF special cleaner
- 0.5 litres hand-hot water

Stir up cleaning solution.

Place all parts completely in the cleaning solution for 5 hours. Then clean thoroughly under flowing warm water.

22

Reassemble the combi spout, insert the milk hose, and replace on the machine.

23

Machines with hose clamping valve: insert the milk hose back into the clamping valve

24

Dispense one portion hot water. Turn switch lock to "R".

25

Place milk hose in the water. Start rinse with the "+" button. Duration approx. 1 minute.

Foamer rinse - optional

26

If a milk beverage was dispensed, after 20 minutes (adjustable), a foamer rinse is carried out automatically. Duration approx. 15 seconds.

Attention!
During the rinse, do not put any containers under the spouts, do not touch the spouts and do not reach under the spout area.
